Testimonial for Anstey & Bull Consultants in Education

Geoff Bull and Michele Anstey have a proven history of leadership in literacy consultancy. For many years, they have been committed to promoting quality teaching and research within educational domains.

Anstey and Bull have been well received in many school environments at primary and secondary levels and have worked with school staff across both government and independent sectors. Their approachable and collegial manner has a dynamic, purposeful influence with teaching staff which serves to build a cohesive team approach. Under the guidance of Anstey and Bull, teachers are readily assisted with developing a repertoire of flexible pedagogical practices related to literacy education.

Their capacity to create specialised literacy workshops to suit specific school concerns has resulted in outstanding successes in conducting the business of moving literacy education forward in terms of planning and teaching within various school contexts. Furthermore, Anstey and Bull's ongoing commitment to supporting teachers has been widely recognised and appreciated.

I highly recommend the engagement of Michele and Geoff to any school community considering contracting them for an educational consultancy.

Sincerely

Susan Morgan
